

LESION ATLAS - CALIBRATION TARGET

PRINT AT 100% SCALE. NO 'FIT TO PAGE'. NO 'SHRINK TO MARGINS'. MATTE PAPER ONLY.

Gloss paper will specular under the lamp and destroy the white-balance reference.

ArUco DICT_4X4_50 id = 0

PRINTED SIZE: 30.0 mm

measured across the OUTER black edge

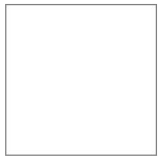

Verify with a ruler before you shoot.

If this is not 30.0 mm, the print scaled
and every millimetre downstream is wrong.

100.0 mm reference - independent check on print scale

COLOUR REFERENCE (sRGB values recorded in the sidecar JSON)

white

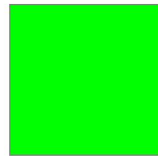

gray18

black

red

green

blue

MOUNTING

Trim on the crop marks and tape to a headband so the marker sits flat, fully in frame
and in the same focal plane as your cheek - not angled away, not behind your ear.

The marker must be visible in ALL THREE poses. Check the 60 deg poses specifically:
a headband marker on the left temple disappears in the right-60 shot.

Reprint whenever the sheet creases, yellows or picks up a shine. It is one page.
